

Wound Care Program

A multidisciplinary approach to wound healing.

Our **specialty wound care program** focuses on treating and healing wounds and how it integrates into the patient's overall health and continuum of care. Our wound specialists and WOCNs (Wound, Ostomy and Continence Nurses) use a multidisciplinary approach to treat wounds and the underlying disease process and cause of the wounds. **We provide tailored and expert care to ensure each patient heals as quickly and comfortably as possible.**

Our program focuses on:

- Patient & Caregiver Education
- Physician Collaboration
- Advanced Wound Care Products & Medications
- Outcome Measurement & Reporting
- Evidence-based treatment protocols based on standards of care developed by The Wound, Ostomy and Continence Nurses Society & The National Alliance of Wound Care
- Continuous assessment and reassessment of wounds, patient care and change in the treatment plan as appropriate

WOCN[®]
Wound, Ostomy, and
Continence Nurses Society[®]

Our goal is to optimize our patient's healing and provide the best possible health outcomes. We create individualized plans for each patient that upholds our commitment and standard for **wound care excellence**.
